Barthi Sandeep Charan

Synopsis: Over 2.5+ years of Experience in the areas of ETL Development, Data Warehousing, Maintenance & Support. Have exposure to Healthcare domain.

EXPERIENCE SUMMARY

Have over 2.5+ years of experience in of ETL Development, Data Warehousing, Maintenance & Support.

- Extensive experience in understanding of ETL and Data Integration concepts, with hands-on experience using tools such as Informatica, Oracle SQL, and Jira.
- Skilled in ETL development, SQL querying, and performance tuning.
- Flexible enough to adapt to new environments.
- Experienced in the SDLC life cycle process, particularly in Agile methodology.
- Skilled in Snowflake and Azure Databricks on an intermediate level.

Areas of Experience

Industry
Healthcare

ETL Tools
Informatica Power Center

Cloud
Snowflake, Azure Databricks

RDBMS
MS SQL
Oracle

Languages
Python

Operating Systems
Windows 10,11 and Advanced

Project Management Tool
Jira

QUALIFICATION

Degree	Institute	Year
Bachelor of Engineering	Godavari Institute of Engineering and Technology, Rajahmundry	2022
Intermediate	Sri Chaitanya Junior College, Kovvur	2018
SSC	Holy Angels English Medium High School	2016

CERTIFICATION

Certification	Institute	Year
Snowflake : SnowPro Core Certification	Snowflake	March 2025
Microsoft Certified: AZ-900 Azure Fundamentals	Microsoft	Dec 2022
Microsoft Certified: DP-900 Azure Data Fundamentals	Microsoft	Feb 2023
Microsoft Certified: AI-900 Azure AI Fundamentals	Microsoft	March 2024
Microsoft Certified: AZ-104 Azure Administrator	Microsoft	Jun 2024
Microsoft Certified: AZ-204 Developing Solutions for Microsoft Azure	Microsoft	Jun 2024

PROJECT EXPERIENCE

PROJECT 1: Parexel CMDM_FPP_H&I (CMDM)

Type: Development and Enhancement

Domain: Healthcare

Tools & Environment: Informatica Power Center 10.x, Informatica B2B, Oracle SQL, Linux, WinSCP, JIRA.

Duration: August 2023 – March 2025

Description: Parexel is among the world's largest clinical research organizations (CROs), providing the full range of Phase I to IV clinical development services to help life-saving treatments reach patients faster. Leveraging the breadth of clinical, regulatory, and therapeutic expertise. Advancing clinical research in healthcare's most complex areas, while our innovation ecosystem offers the best solutions to make every phase of the clinical trial process more efficient. Responsible for loading clinical data into the Data Warehouse and delivering it to clients as Data Marts. This involved the process of extracting data from websites and loading it into CMDM Data Warehouse, then transferring the data from the Data Warehouse to the client's extract as Data Mart. Executed these tasks using Workflows, mappings in ETL Informatica tool, and Oracle DB.

Role & Responsibilities: Informatica ETL Developer

- Analyzed requirements from Business Analysts and reviewed Mapping Documentation.
- Developed requested changes in mappings using Informatica PC and SQL.
- Conducted thorough unit testing on the implemented changes.
- Collaborated with team members to address any inquiries or suggestions.
- Utilized session logs to handle errors during workflows and session failures.
- Leveraged Informatica Power Center for ETL processes, extracting, transforming, and loading data from various source systems into the target database and from databases to flat files.
- Utilized tools such as Power Center Repository Manager, Power Center Designer, Power Center Workflow Manager, Power Center Workflow Monitor, Oracle SQL, ALM, and JIRA.
- Engaged in debugging and enhancement activities as required.
- Worked on Agile Methodology and tracked using Jira board.
- Performance tuning was done at the functional level and mapping level. Used relational SQL wherever possible to minimize the data transfer over the network.
- Effectively used Informatica parameter files for defining mapping variables, workflow variables, FTP connections and relational connections.
