HEXAWARE

GUNDAM HARIKA

Synopsis: A Maverick who has completed Data Engineering program with Hexavarsity, looking for an opportunity to work where I can utilize my skills for developing my career and contribute to the growth of the organization and myself.

EXPERIENCE SUMMARY

- Completed training on Data Engineering with **PySpark** and **Azure Databricks**
- Strong foundation on **Python** and **SQL Server**.
- Worked with Azure Databricks environment.

Areas of Experience

Applications

Olympic Analysis

Virtual Art Gallery

Ecommerce application

Technology

Python

SQL Server

Pandas

PySpark

Azure Databricks

Tools

VS Code

Azure Databricks

MS SQL Server

QUALIFICATION

Degree	Institute	Year
Bachelor of Technology Electronics and Electrical Engineering	Rajeev Gandhi Memorial College of Engineering and Technology, Nandyal-518502	2024
12th	Sri Chaitanya junior College, Vijayawada	2020
10th	Montessori Residential School, Kurnool	2018

Been training with Hexaware Technologies Ltd. from August 2024 – Till date

PROJECT EXPERIENCE

Project Name	**:** Olympic Analysis
Environment	**:** Windows 11
Technology	**:** Pyspark, Pandas, SQL Server
Tools Used	**:** VS Code, Azure Workspace

Description: Developed a project, which has the detailed analysis of the Olympic events in the duration of 2008 to 2016, where the input data sets had the raw data, hence performed data cleaning and then organized the given data into dimension and fact tables and extracted the required reports so as to get an analysis of the trends of sports or the country-wise performances and published them into various file formats like csv, parquet, …

Roles and Responsibilities:

- Loaded and ingested data into PySpark.
- Preprocessed data by handling nulls and structuring for analysis.
- Conducted exploratory data analysis to identify required patterns.
- Generated and published the final reports into the database.

Project Name	**:** Virtual Art Gallery
Role	**:** Team Member
Technology	**:** Python and SQL Server
Tools Used	**:** VS Code, MS SQL Server

Description: Developed a Virtual Art Gallery project and designed the schema for a Virtual Art Gallery that involves creating a structured representation of the database that will store information about artworks, artists, users, galleries, and various relationships between them.

Roles and Responsibilities:

- Developed a system to link each relationship among artworks, users, artists, and galleries.
- Built clear user-prompts to enable user to have a smooth experience.
- Efficiently joined multiple tables without any redundancy ensuring Data Integrity.

Project Name	**:** Ecommerce Application
Role	**:** Individual
Technology	**:** Python and SQL Server
Tools Used	**:** VS Code, MS SQL Server

Description: Developed an eCommerce application to enable seamless online buying and selling, with features for managing product catalogs, processing orders, and secure payments. It supports adding or removing products, tracking transactions, and providing a personalized shopping experience while ensuring efficient business management and scalability

Roles and Responsibilities:

- Gathered the most popular and frequently purchased items to optimize the product catalog.
- Managed unique IDs for products to streamline inventory and order tracking.
- Analyzed customer purchase patterns to forecast future demand and stock requirements.
- Visualized trends and customer preferences to enhance marketing strategies and improve inventory management
