HARSHITA AGRAWAL

+91-7000062129 | agrawal.harshita023@gmail.com | Pune, India

OBJECTIVE

Targeting challenging roles as a Java Developer, Java Backend Developer, or Java Full Stack Developer. Eager to leverage extensive Java development expertise to contribute to innovative projects and drive business success through efficient software solutions.

PROFILE SUMMARY

- Illustrating above 3 years of proficiency as a Java Developer in the IT sector, showcasing expertise in diverse projects.
- Actively contributing as a Software Engineer at Cognizant, focusing on Java, Spring, Spring Boot, JPA, Maven/Gradle and Microservices to drive innovative solutions and project maintenance.
- Good core java knowledge and programming skills. Comfortable in Object Oriented Programming using Java.
- Exhibiting capability to deliver high-quality results, collaborate effectively in teams, and meet project deadlines consistently.
- Proven record in delivering assigned deliverables on time and as expected.
- Implemented database optimization strategies and code enhancements, resulting in a significant 20% enhancement in program efficiency.

TECHNICAL SKILLS

- **Programming Language** : Java 8+, SQL, Design pattern.
- **Frameworks** : Spring Boot, Data JPA, Microservices, Docker, Kafka(Messaging)
- **Database Management** : PostgreSQL, MySQL.
- **Testing Tools** : Junit, Mockito, Integration Testing.
- **Code Quality Tools** : SonarQube
- **Version Control** : Git
- **Other Tools** : Gradle, Maven, Data Structure & Algorithm, GitHub, Cloud , Agile
- **Tools** : Postman, Eclipse, GitHub, TeamCity, Sonar
- **Soft Skills** : Communication, Analytical, Adaptability, Team player, Logical & Critical Thinking, Problem Solving

WORK EXPERIENCE

1. Cognizant Technology Solutions

Tech Stack - Java, Spring Boot, JPA, Spring Data JPA, Kafka
Total Experience - 3 years
Role - Programmer Analyst
Duration - March 2022 to Present

Project 1 - Telecommunications and E-Commerce

Verizon Communications Inc. is a global leader in telecommunications, offering services in wireless, broadband, and digital TV. Known for its reliable network and technological innovations, Verizon connects people and businesses, with brands like Verizon Wireless, Fios, and Verizon Business. Its mission is to advance the digital world and enhance how people live, work, and play.

Responsibilities-

- Developing an e-commerce platform for the Retail and Consumer sector, focusing on cart, order, checkout related functionalities using Java, Spring Boot, Spring Data JPA .
- Implemented Redis caching to enhance cart service performance and reduce load times.
- Integrated client-specific requirements to optimize cart features within a microservices-based architecture.
- Improved code reliability and functionality by writing comprehensive unit tests using JUnit.
- Utilized SonarQube to detect and resolve code smells, ensuring maintainable, high-quality code.
- Worked with Kafka messaging to wire up services for effective communication, enabling seamless integration and data flow between microservices.

Project 2 - Logistics and Transportation

The project is designed to optimize and manage organizational processes across various divisions. It integrates global activities in refined metals, concentrates, coal, and iron ore within the nonferrous and bulk sectors. The system also oversees a global fleet of over 40 vessels, facilitating efficient shipping and chartering operations for dry and wet cargo contracts on international markets. Additionally, it handles the sourcing, storing, blending, and transportation of oil and petroleum products to meet diverse customer requirements worldwide.

Responsibilities-

- Collaborated with the Cost and Income Team to enhance a Trading Application built on the Spring framework with Oracle Database, driving seamless integration and functionality improvements.
- Leveraged Java 8's advanced features to optimize code performance and enrich project capabilities, delivering more efficient and effective solutions.
- Implemented JUnit best practices to ensure robust testing, including comprehensive assertions and extensive coverage of various use cases to guarantee code reliability.
- Engaged actively in Agile Development processes, contributing to Sprint Planning and retrospectives, and fostering a collaborative and iterative development environment.
- Proactively identified and addressed potential issues through regular code reviews, reducing post-release bug reports and improving overall software stability.
- Provided on-call support for incident response, resolving production issues promptly to maintain system integrity and minimize downtime.
- Developed and executed comprehensive test cases using JUnit and Mockito, significantly improving code coverage and ensuring high-quality deliverables.

PERSONAL PROJECTS

Blog Application-

- Developed a personal blog application to manage and share articles using Spring Boot and Data JPA in a microservice architecture.
- Designed REST APIs to handle blog posts, comments, and user management functionalities.
- Established a one-to-many relationship between posts and comments in the database.
- Implemented data persistence using Data JPA, leveraging SQL for efficient data handling.

EDUCATION

Degree	Board/Institute	Percentage	Year of Passing
B.Tech In C.S.E.	Institute of Technology and Management, RGPV AFFILATED	89.20 %	2022
H.S.C	Kiddy's Corner High School , C.B.S.E. Board	61.00 %	2018
S.S.C	Samarth Bal Mandir ,Madhya Pradesh State Board	87.67 %	2016

CERTIFICATIONS

- AWS Certified Could Practitioner
- AWS Academy Graduate – AWS Academy Cloud Foundations

PERSONAL DETAILS

Full Name : Harshita Agrawal
Date of Birth : 23rd Dec 1999
Languages Known : English, Hindi
Nationality : Indian
Strength : Quick Learner, Team Player, Hard Worker

INTERESTS

Playing Cricket, Playing Carrom, Playing Chess, Cooking, Watching Cricket, Reading, Trading
