# NEHDIA SAMAN

**Synopsis:** Software Engineer with 2.10 Years of experience. Adept at developing and maintaining server-side applications using Node.js and AWS Skilled in leveraging Node.js to build scalable applications, utilizing AWS Lambda for serverless computing, and implementing ETL (Extract, Transform, Load) processes. Proficient in using Postman for API testing and troubleshooting production issues to ensure seamless operation and optimal performance.Seeking a challenging position to leverage my technical expertise and contribute to the success of a forward-thinking organization..

**Areas of Experience**

**Applications**
AWS
Datadog
Service now
Microservices API

**RDBMS**
MS SQL Server

**Source Safe Tools**
Git
Postman
JIRA
Mysql
Visual studio Code

EXPERIENCE SUMMARY

- Has over 2.10 years of experience.
- Experience in working with AWS services including Lambda, S3, Step Functions, DynamoDB, and CloudWatch.
- Experience in monitoring data pipeline health and setting up alerts for early issue detection.
- Strong fundamental knowledge in SQL queries.
- Experience in analyzing and debugging AWS Lambda logs to identify root causes of failures.
- Managing deployments and changes in a controlled production environment.
- Proficient in using ServiceNow for end-to-end incident, problem, and change management.

**QUALIFICATION**

| Degree | Institute | Year |
|---|---|---|
| Bachelors of Technology | Jawaharlal Nehru Technological university | 2018-2022 |

**CERTIFICATION**

| Certification | Year |
|---|---|
| AWS Certified cloud | 2023 |
| AZ-900 Microsoft Certified:Azure | 2022 |

# NEHDIA SAMAN

**Working with Hexaware Technologies Ltd. From June 2022– Till date**

**PROJECT EXPERIENCE**

| | |
|---|---|
| **Project Name** | **Wickes** |
| **Role** | **Application support Analyst** |
| **Duration** | **Feb 2023 to Till Date.** |
| **Tools Used** | **Git,Postman,JIRA,Mysql,Visual** |

**Description:**

Wickes is a British home improvement retailer that primarily provides products and services related to DIY (Do-It-Yourself) home improvement and construction.Wickes specializes in providing building materials, tools, hardware, and home improvement products. Overall, Wickes is classified as a retail and service provider in the home improvement industry.

**Roles and Responsibilities:**

- Managed production support for ETL processes (Lambda functions), including job scheduling, monitoring, and troubleshooting.
- Automated ETL operations with AWS Lambda functions, handling data extraction from various sources through AWS trigger events and transforming it according to predefined mappings.
- Integrated transformed data into business systems, leading to a 20% improvement in operational effciency and a 15% reduction in processing time, facilitating focus on application features and scalability.
- Applied SQL for comprehensive data validation, cleaning, and transformation, ensuring data ac- curacy and integrity
- Created and executed API requests in Postman for monitoring critical business services and the File Transfer Service(FTS), optimizing file transfer processes by 30% and ensuring timely data delivery
- Engineered efcient ETL pipelines using AWS Lambda and DynamoDB, enhancing data processing and transformation workfows.
- Developed robust and scalable Node.js backend services on the AWS serverless platform, leveraging AWS Lambda and other AWS services to deliver high-performance solutions.
- Designed and implemented RESTful APIs using AWS API Gateway, improving system responsive- ness and user interactions.
- Performed root cause analysis on recurring production job issues, implementing solutions to resolve failures and improve stability.
- Partnered with business analysts and stakeholders to translate data requirements into effective ETL solutions.
